

For staff and student exchange from European Universities; UNTAD is able to host those who are particularly interested in doing short term research in tropical rain forest, flora and fauna identification (biology sciences), agricultural sciences, and economics. Regarding the thought program, we have several in English but only partial programs, no bachelor or master program thought entirely in English.

Interested staff and students are requested to contact Ms Aiyen Tjoa (aiyenb@yahoo.com) directly. The website is not available in English.
