|--|

As at October 1st, 2018

§ 1 QUALIFICATION PROFILE

The Master programme in Water Management and Environmental Engineering is a degree programme which serves to deepen and extend students' pre-vocational academic education, building on the basis provided by a Bachelor degree programme (§ 51 [2] item 5 of the Universities Act UG 2002, Federal Law Gazette BGBl I no. 81/2009). The programme fulfils the requirements of Directive 2005/36/EC on the recognition of professional qualifications, article 11, letter e.

The Master degree programme allows students to consolidate their knowledge of the areas and working practices within the applied sciences and their engineering-related applications. This study programme is aimed at enabling the use of the natural resource water by humans as well as ensuring its provision, diagnosing natural hazards and developing solutions for the protection and management of natural hazards.

The Master study programme is designed as a programme in English. This means that all courses are offered in English. Students' achievements such as exams, seminar papers and the Master's Thesis therefore have to be completed in English. Consequently, adequate competences of the English language are obligatory.

The Master study programme offers two specialisation options:

1. Water Management and Engineering
2. Mountain Risk Engineering

These specialisations are explicitly stated in the final degree document.

1a) Knowledge and Personal and Professional Skills

Water management aims at the sustainable use and safeguarding of the resource water. Thereby, it finds itself in an area of conflict of economic and ecologic objectives. The understanding of the water circle has to be the basis for all water management measures. It is imperative that the multifaceted functions of the natural potential water in its interplay with the soil is used and protected in the most perfect and purposeful way. Furthermore, it needs to be sustainable safeguarded for our livelihood. It gets harder and harder to provide the adequate quantity of water and, in particular, to also ensure sufficient water quality. Therefore, the focus on exceedingly complex ecological interrelationships and interdependencies gets more and more important.

For this professional training, a good basic scientific knowledge is required, in addition to a comprehensive understanding of the sustainable use of resources and a logical mind for responsible planning, design, construction and maintenance.

During the Master degree programme graduates of “Water Management and Environmental Engineering” acquire knowledge and skills in the areas of hydrology, water management planning, constructive hydraulic engineering and river management, cultural water and groundwater management, settlement water management, industrial water management and water protection, hydrobiology and water ecology, waste management.

In the field of Mountain Risk Engineering the identification of geo risks and the development of safety measures are essential. Thereby, special significance is given to the usages of integrative methods for risk management. Special expertise on alpine mass transportation, description and modeling of these processes and the technical constructions of safety measures are gained.

Graduates of the Master study programme Water Management and Environmental Engineering acquire the theoretical and practical knowledge in the fields of planning, administration and economy necessary for successful working. Within the framework of the university education communication, coordination and management skills are acquired. Activities such as mobility, improvement of language skills and internationality are promoted in the Master study programme and help students gain further competences for international occupational activities.

1b) Professional Qualifications

The versatility of this education opens the following fields of work for graduates:

- In commercial enterprises: as consulting engineers and in planning agencies, in industry and trade, in consulting offices, etc. ...
- In the services sector: in research and testing institutions, in planning agencies, engineering offices, etc. ...
- In administration and education: in the public sector (federal ministries, governments and district administration), as appraiser
- In development cooperation
- In international organisations including EU organisations

§ 2 ADMISSION REQUIREMENTS

Graduates of the Bachelor programme in Environmental Engineering offered by BOKU University of Natural Resources and Life Sciences are eligible for admission with no further requirements.

Graduates of other Bachelor degrees who wish to take the Master degree in Water Management and Environmental Engineering must be able to demonstrate a fundamental, equivalent knowledge of the central subjects taught as part of the Bachelor degree in Environmental Engineering. In detail, it deals with those designated courses stated in the areas of natural scientific basic principles, technical and subject-specific basic principles, social sciences, economics, law and the vocational compulsory subjects (culture-technical core area).

For graduates of Bachelor programmes completed at other universities, mastery of the following learning outcomes is required for admission:

- (1) Basic knowledge in natural sciences: Mathematics, statistics, physics, chemistry, geology, soil science and botany, hydrobiology
- (2) Basic knowledge in technical sciences: Geometry, mechanics, statics and strength of materials, surveying, structural design, geotechnics, geoinformation
- (3) Basic knowledge in environmental engineering: hydraulics, hydrology, river basin management, hydraulic engineering, settlement water management, hydrology,

waste management, transport, rural water management, spatial planning and construction economics

Students are directly entitled to admission to the study programme if they can provide proof of 20 ECTS credits each in all three areas.

Furthermore, competences in English at a level of B2 (according to the Common European Framework of Reference for Languages by the Council of Europe) are a precondition.

§ 3 PROGRAMME STRUCTURE

3a) Duration, Total ECTS Credits and Structure

The programme consists of courses and other requirements worth a total of 120 ECTS credits. This is equivalent to a duration of four semesters (a total of 3,000 60-minute credit hours). The programme is divided into

| | |
|---------------------|--|
| Compulsory courses: | 32 ECTS credits, including |
| Master's seminar: | 2 ECTS credits |
| Elective courses: | 46 ECTS credits (thereof 30 ECTS obligatory courses) |
| Free electives: | 12 ECTS credits (thereof 3 ECTS practical training optional) |
| Master's Thesis: | 30 ECTS credits |

Detailed Structure of the Study Programme:

| | |
|----------------------------------|-----------------|
| Compulsory Basic Subjects | |
| Basic Subjects | 12 ECTS credits |
| Complementary Subjects | 12 ECTS credits |
| Engineering Project | 6 ECTS credits |
| Master's seminar | 2 ECTS credits |

Specialisations

1. *Water Management and Environmental Engineering (WME):*

5 sectoral subjects to the extent of 30 ECTS credits have to be completed (each of the sectoral subjects is worth 6 ECTS credits).

Sectoral subjects 30 ECTS credits

For the specialisation in Water Management and Environmental Engineering at least 3 sectoral subjects have to be chosen from "*Sanitary Engineering*", "*Rural Water Management*", "*Hydrology and Water Management*" and "*Hydraulic Engineering and River Basin Management*".

or

2. Mountain Risk Engineering (MRE):

5 sectoral subjects to the extent of 30 ECTS credits have to be completed (each sectoral subject is worth 6 ECTS credits).

Sectoral subjects 30 ECTS credits

For the specialisation in Mountain Risk Engineering the sectoral subjects “*Mountain Hazard Processes*”, “*Mitigation Measures for Mountain Hazards*” and “*Risk Management*” are compulsory.

| | |
|---|-----------------|
| Elective Specialisation Subjects | 16 ECTS credits |
|---|-----------------|

have to be chosen out of the 5 sectoral subjects!

| | |
|----------------------------|-----------------|
| Elective Subjects | 12 ECTS credits |
| (incl. Practical Training) | 3 ECTS credits) |
| Master’s Thesis | 30 ECTS credits |

| | |
|--------------|-------------------------|
| Total | 120 ECTS credits |
|--------------|-------------------------|

3b) Three-Pillar Principle

The three-pillar principle is one of the central identifying characteristics of both the Bachelor and Master programmes offered at the University of Natural Resources and Life Sciences, Vienna. In the Master programmes, the sum of the compulsory and elective courses must be made up of at least

15% technology and engineering

15% natural sciences

15% economic and social sciences, law

The Master’s Thesis, compulsory internship and free electives are excluded from the three-pillar rule.

3c) Limited Number of Participants in Courses

For courses with a limited number of participants the head of the Master course is authorised to first admit students enrolled in the Master programme (that means that students enrolled in a Bachelor study programme can only be admitted to the courses if further spaces are left on the course!) The admission of students enrolled in the Master study programme is conducted according to the following order of required courses by the students: compulsory course, elective course, free elective course.

§ 4 COMPULSORY COURSES

Used Abbreviations:

ECTS = European Credit Transfer System

WS = Winter Semester

SS = Summer Semester

Notes:

¹⁾ In German

²⁾ In English and German

³⁾ Courses not offered in the academic year 2018/19

⁴⁾ Courses only offered in even academic years

⁵⁾ Courses only offered in uneven academic years

The following compulsory courses to the extent of 32 ECTS credits are required to complete the Master programme:

| Course Number | Course Title | Semester | Course Type | ECTS Credits |
|------------------|---|-------------|-------------|--------------|
| | Basics | | | |
| 815340 | Lecture series in soil, water and atmosphere | WS | VO | 3.0 |
| 851311 | Environmental statistics | SS | VU | 3.0 |
| 731370 | Operations research and system analysis | SS | VU | 3.0 |
| 816333 | International law and cooperation development | WS | VO | 3.0 |
| | Complementary Subjects | | | |
| 857321 | Remote sensing and GIS in natural resource management | WS | VO | 3.0 |
| 873320 | Geotechnics | SS | VO | 3.0 |
| 872330 | Hydrogeology | WS | VU | 3.0 |
| 875330 | Planning and design / conceptual design ² | WS | VO | 3.0 |
| | Engineering Project | | | |
| 810301 870305 | Structural exercises *) | WS or SS | UE | 6.0 |
| | Master's Seminar | | | |
| | Master's thesis seminar | | SE | 2 |

*) For the specialisation in Water Management and Environmental Engineering the **Engineering project has to be chosen from the 4 sectoral subjects** "Sanitary Engineering", "Rural Water Management", "Hydrology and Water Management" and "Hydraulic Engineering and River Basin Management".

For the specialisation in Mountain Risk Engineering the **Engineering project has to be chosen from the 3 sectoral subjects** "Mountain Hazard Processes", "Mitigation Measures for Mountain Hazards" and "Risk Management".

§ 5 ELECTIVE COURSES

Elective courses worth a total of 46 ECTS credits are required to complete the Master programme. These are structured in 11 specialist division units. Once a unit is chosen the completion of 6 ECTS points each is compulsory. 5 sectoral subjects have to be chosen!

For the specialisation in Water Management and Environmental Engineering at least 3 sectoral subjects have to be chosen from “*Sanitary Engineering*”, “*Rural Water Management*”, “*Hydrology and Water Management*” and “*Hydraulic Engineering and River Basin Management*”.

For the specialisation in Mountain Risk Engineering the sectoral subjects “*Mountain Hazard Processes*”, “*Mitigation Measures for Mountain Hazards*” and “*Risk Management*” are compulsory. Additionally 16 ECTS credits from the elective courses have to be completed.

Detailed Structure of the Sectoral Subjects:

1. Sanitary Engineering

| Course Number | Compulsory Courses | Semester | Course Type | ECTS Credits |
|---------------|--|----------|-------------|--------------|
| | Course Title | | | |
| 811362 | On site solutions for water supply and sanitation | WS | VO | 3.0 |
| 811358 | Planning and design in water supply and wastewater treatment | SS | UE | 3.0 |

| Course Number | Elective Courses | Semester | Course Type | ECTS Credits |
|---------------|---|----------|-------------|--------------|
| | Course Title | | | |
| 811354 | Case studies in sanitary engineering | WS | SE | 3.0 |
| 811360 | Modelling in sanitary engineering (sewer, treatment plant and receiver) | WS | VU | 4.5 |
| 811363 | Industrial water management | SS | VO | 3.0 |
| 811332 | Water resources management in developing co-operation | SS | VU | 3.0 |
| 811357 | Biology, chemistry and microbiology for civil engineering | SS | VU | 3.0 |

2. Rural Water Management

| Course Number | Compulsory Courses | Semester | Course Type | ECTS Credits |
|---------------|---------------------------------------|----------|-------------|--------------|
| | Course Title | | | |
| 815342 | Rural water management (advanced) | SS | VO | 3.0 |
| 815321 | Soil conservation and soil protection | WS | VU | 3.0 |

| Course Number | Elective Courses | Semester | Course Type | ECTS Credits |
|---------------|---|----------|-------------|--------------|
| | Course Title | | | |
| 815320 | Soil water management | WS | VO | 3.0 |
| 815322 | Soil erosion models and their application | WS | VU | 4.5 |
| 815313 | Physical and selected chemical methods of soil analysis | SS | PR | 4.5 |
| 815311 | Simulation in vadose zone environment | WS | VU | 3.0 |
| 815319 | Irrigation design | WS | VU | 3.0 |

3. Hydrology and Water Management

| Course Number | Compulsory Courses | Semester | Course Type | ECTS Credits |
|---------------|---|----------|-------------|--------------|
| | Course Title | | | |
| 816334 | Hydrological processes and modelling | WS | VU | 3.0 |
| 816338 | Water resources planning and management | WS | VO | 3.0 |

| Course Number | Elective Courses | Semester | Course Type | ECTS Credits |
|---------------|--|----------|-------------|--------------|
| | Course Title | | | |
| 816336 | Integrated flood risk management | WS | VO | 3.0 |
| 816347 | Application of GIS in hydrology and water management | SS | VO | 3.0 |
| 816343 | Environmental risk analysis and management | SS | VO | 3.0 |
| 816342 | Possible impacts of climate change on water resources | SS | VO | 3.0 |
| 816325 | Flood forecasting and flood protection | SS | SE | 3.0 |
| 816305 | Seminar in surface hydrology ¹ | SS | SE | 3.0 |
| 816303 | Seminar in groundwater management | WS | SE | 3.0 |
| 816351 | Hydrometric and river engineering field exercises ¹ | SS | PR | 4.5 |

4. Hydraulic Engineering and River Basin Management

| Course Number | Compulsory Courses | Semester | Course Type | ECTS Credits |
|---------------|--|----------|-------------|--------------|
| | Course Title | | | |
| 816301 | Hydraulic engineering and river basin management | WS | VO | 3.0 |
| 816339 | Sediment regime and river morphology | SS | VO | 3.0 |

| Course Number | Elective Courses | Semester | Course Type | ECTS Credits |
|---------------|---|----------|-------------|--------------|
| | Course Title | | | |
| 816340 | Ecologically oriented methods and monitoring in river engineering | SS | VU | 3.0 |
| 816332 | Computer based river modelling | WS | VU | 3.0 |
| 816351 | Hydrometric and river engineering field exercises ¹ | SS | PR | 4.5 |
| 816318 | Monitoring in river engineering ¹ | SS | VO | 3.0 |

5. Aquatic Ecology and Wetland Management

| Course Number | Compulsory Courses | Semester | Course Type | ECTS Credits |
|---------------|---------------------------------------|----------|-------------|--------------|
| | Course Title | | | |
| 812347 | Human impacts in riverine landscapes | WS | VO | 2.0 |
| 812384 | Aquatic biomonitoring and -assessment | WS | VO | 2.0 |
| 812349 | Ecological river landscape management | WS | VO | 2.0 |

| Course Number | Elective Courses | Semester | Course Type | ECTS Credits |
|---------------|--|----------|-------------|--------------|
| | Course Title | | | |
| 812358 | Benthic invertebrate status assessment | SS | VU | 3.0 |
| 812357 | Benthic invertebrate sampling and monitoring | SS | VU | 3.0 |
| 812344 | Ecology of fishes | WS | VO | 3.0 |
| 812350 | Applications in river landscape management | WS or SS | VX | 2.0 |

| | | | | |
|--------|---|----|----|-----|
| 812380 | Multi-scale modelling and system dynamics in aquatic ecosystems | SS | VU | 2.0 |
| 831301 | Ecology of aquatic plants | SS | VU | 2.0 |

6. Water Management in Developing Countries

| Course Number | Compulsory Courses | Semester | Course Type | ECTS Credits |
|---------------|---|----------|-------------|--------------|
| | Course Title | | | |
| 731333 | Globalisation and rural development | SS | VO | 3.0 |
| 811332 | Water resources management in developing co-operation | SS | VU | 3.0 |

| Course Number | Elective Courses | Semester | Course Type | ECTS Credits |
|---------------|--|----------|-------------|--------------|
| | Course Title | | | |
| 811334 | Risk assessment in the aquatic environment | WS | VU | 3.0 |
| 811362 | On site solutions for water supply and sanitation | WS | VO | 3.0 |
| 811308 | Appropriate technologies for water supply & sanitation in developing countries (in Eng.) | SS | VO | 3.0 |
| 815308 | Selected topics of hydraulics and rural water management ³ | SS | VO | 3.0 |
| 911343 | In-situ treatment of polluted soils and sediments: phytoremediation, in-situ fixation and attenuation techniques | SS | UE | 3.0 |
| 874300 | Soil-bioengineering techniques (slopes and gullies) | SS | VS | 3.0 |
| 169317 | Participatory methods in development research and practice | SS | SE | 3.0 |

7. Waste Management

| Course Number | Compulsory Courses | Semester | Course Type | ECTS Credits |
|---------------|----------------------------|----------|-------------|--------------|
| | Course Title | | | |
| 813300 | Global waste management I | WS | VO | 3.0 |
| 813301 | Global waste management II | SS | VO | 3.0 |

| Course Number | Elective Courses | Semester | Course Type | ECTS Credits |
|---------------|---|----------|-------------|--------------|
| | Course Title | | | |
| 813307 | Waste management seminar | WS | SE | 4.5 |
| 813303 | Planning and assessment of waste management systems | SS | VU | 3.0 |
| 813304 | Life cycle management | SS | VO | 2.0 |

8. Economy and Law

| Course Number | Compulsory Courses | Semester | Course Type | ECTS Credits |
|---------------|---|----------|-------------|--------------|
| | Course Title | | | |
| 731348 | Managerial economics | WS | VU | 3.0 |
| 731328 | Valuation methods for natural resources | SS | VO | 3.0 |

| Course Number | Elective Courses | Semester | Course Type | ECTS Credits |
|---------------|--|----------|-------------|--------------|
| | Course Title | | | |
| 731325 | Principles of commodity markets and trade policy | SS | VO | 3.0 |
| 731335 | Game theory in environmental and natural resource management | SS | VO | 3.0 |
| 731324 | Resource and environmental economics | SS | VO | 3.0 |
| 732326 | Institutions and policies of the EU (Introduction to the law and politics of the European union) | SS | VO | 3.0 |
| 731347 | Regional economics and regional governance | SS | VO | 3.0 |
| 169306 | Negotiating change: Simulating an international conference for sustainable development | WS | VS | 3.0 |

9. Mountain Hazard Processes

| Course Number | Compulsory Courses | Semester | Course Type | ECTS Credits |
|---------------|---------------------------|----------|-------------|--------------|
| | Course Title | | | |
| 871324 | Mountain hazard processes | WS | VX | 6.0 |

| Course Number | Elective Courses | Semester | Course Type | ECTS Credits |
|---------------|---|----------|-------------|--------------|
| | Course Title | | | |
| 871303 | Rock fall ^o | WS | VS | 1.5 |
| 871328 | Snow and avalanches | WS | VX | 3.0 |
| 871358 | Dynamics of geophysical flows | WS | VS | 3.0 |
| 912314 | Mountain forest climatology and headwater hydrology | WS | VU | 4.5 |

10. Mitigation Measures for Mountain Hazards

| Course Number | Compulsory Courses | Semester | Course Type | ECTS Credits |
|---------------|---------------------------|----------|-------------|--------------|
| | Course Title | | | |
| 871327 | Mountain risk engineering | SS | VX | 6.0 |

| Course Number | Elective Courses | Semester | Course Type | ECTS Credits |
|---------------|---|----------|-------------|--------------|
| | Course Title | | | |
| 916326 | Management and forest protection in high altitude afforestations and protective forests | SS | VX | 3.0 |
| 874300 | Soil-bioengineering techniques (slopes and gullies) | SS | VS | 3.0 |
| 816340 | Ecologically oriented methods and monitoring in river engineering | SS | VU | 3.0 |
| 913327 | Fire management in mountain forest ecosystems - prophylaxis and control | SS | VS | 2.0 |

11. Risk Management

| Course Number | Compulsory Courses | Semester | Course Type | ECTS Credits |
|---------------|--|----------|-------------|--------------|
| | Course Title | | | |
| 871360 | Risk management and vulnerability assessment | WS | VS | 3.0 |
| 871331 | Cost/benefit analysis | SS | VO | 3.0 |

| Course Number | Elective Courses | Semester | Course Type | ECTS Credits |
|---------------|---|----------|-------------|--------------|
| | Course Title | | | |
| 857320 | Remote sensing and GIS in natural resource management | WS | UE | 3.0 |
| 816336 | Integrated flood risk management | WS | VO | 3.0 |
| 811334 | Risk assessment in the aquatic environment | WS | VU | 3.0 |
| 871332 | Disaster management | WS | VO | 2.0 |
| 816343 | Environmental risk analysis and management | SS | VO | 3.0 |

§ 6 FREE ELECTIVES

Free electives worth a total of 12 ECTS credits are required to complete the Master programme. Free electives may be selected from all courses offered by all recognized universities in Austria and abroad. Free electives are intended to impart knowledge and skills in the student's own academic subject as well as in fields of general interest. It is recommended to choose elective courses from the sectoral subjects.

§ 7 COMPULSORY INTERNSHIP

In the course of the Master study programme Water Management and Environmental Engineering no compulsory internship has to be completed. The internship is intended to help students improve the skills acquired in their degree programme. It is also intended to encourage students to learn to apply what they have learned in practice, and recognize relationships between theory and practice.

The internship shall be at least 3 weeks in duration and will be awarded 3 ECTS credits in the form of an internship seminar (free elective). This requires the submission of a brief report on the practical experience as well as the employer's written confirmation of the completed training.

§ 8 MASTER'S THESIS

A Master's Thesis is a paper on a scientific topic, to be written as part of a Master degree programme (for exceptions please see the By Laws of the University of Natural Resources and Life Sciences, Vienna, part III- Teaching, § 30[9]). The thesis is worth a total of 30 ECTS credits. With their Master's Thesis, students demonstrate their ability to independently address a scientific topic, both thematically and methodologically (§ 51 [8] UG 2002 BGBl. I no. 81/2009).

The topic of a Master's Thesis shall be chosen in such a way that it is reasonable to expect a student to be able to complete it within six months. Multiple students may jointly address a topic, provided that the performance of individual students can be assessed (§ 81 [2] UG 2002 BGBl. I no. 81/2009).

The Master's Thesis shall be written in English. The thesis defence must be held in English.

§ 9 COMPLETION OF THE MASTER PROGRAMME

The Master programme in *Water Management and Environmental Engineering* has been completed when the student has passed all required courses and received a positive grade on the Master's Thesis and defence examination.

§ 10 ACADEMIC DEGREE

Graduates of the Master programme in *Water Management and Environmental Engineering* are awarded the academic title *Diplomingenieur* (m) or *Diplomingenieurin* (f), abbreviated as Dipl.-Ing./ Dipl.Ing.ⁱⁿ or DI/DIⁱⁿ. The academic title Dipl.-Ing./Dipl.Ing.ⁱⁿ or DI/DIⁱⁿ, if used, shall precede the bearer's name (§ 88 [2] UG 2002 BGBl. I no. 81/2009).

§ 11 EXAMINATION REGULATIONS

(1) The Master programme in *Water Management and Environmental Engineering* has been completed successfully when the following requirements have been met:

- positive completion of compulsory courses worth a total of 32 ECTS credits (§ 4)
- positive completion of elective courses worth a total of 46 ECTS credits (§ 5)
- positive completion of free electives worth a total of 12 ECTS credits (§ 6)
- a positive grade on the Master's Thesis and the defence examination
-

(2) Student evaluation takes the form of course and module examinations. Course examinations can be either written or oral, as determined by the course instructor, taking the ECTS credit value of the course into account. Any prerequisites for admission to examinations shall be listed in § 4 under the respective course/module.

(3) The choice of examination method shall be based on the type of course: Lectures shall conclude with a written or oral examination, if continuous assessment of student performance is not applied. Seminars and project-based courses can be evaluated based on independently written papers, length and contents of which are determined by the course instructor. For all other course types, the examination type is at the instructor's discretion.

(4) The topic of the Master's Thesis shall be selected from one of the subjects of the Master programme. The student must inform the dean in writing prior to the commencement of the work on the Master's Thesis. Thereby, the student has to state the Master's Thesis topic as well as the name of the supervisor of the Master's Thesis.

(5) The completed Master's Thesis which has been assessed positively by the supervisor shall be publically presented by the student and defended in the form of an academic discussion (defence examination) after successful completion of all courses. The committee shall consist of a committee chair and two additional university lecturers with a *venia docendi* or equivalent qualification. The student's total performance (thesis and defence examination) will be assigned a comprehensive grade. Both thesis and defence examination must receive a passing grade for the student to complete the programme. The written evaluations stating the grounds for the thesis grade and the defence examination grade are included in calculating the comprehensive grade and are documented separately.

The comprehensive grade is calculated as follows:

- Master's Thesis: 70%
- Defence examination (incl. presentation): 30%

(6) A comprehensive evaluation of the student's performance on the entire programme shall be assigned. A comprehensive evaluation of "passed" means that each individual component of the programme was completed successfully. If individual components of the programme have not been successfully completed, the comprehensive evaluation is "failed". A comprehensive evaluation of "passed with honours" is granted if the student has received no grade worse than a 2 (good) on all individual components, and if at least 50% of the individual components were graded with 1 (excellent).

§ 12 TRANSITIONAL PROVISIONS

For students in the new Master's curriculum, examinations for courses listed in § 4 and § 5, which have been taken under the provisions of another Master programme, shall be recognized towards the programme under this curriculum.

§ 13 EFFECTIVE DATE

This curriculum shall take effect on October 1st, 2018.

ANNEX A TYPES OF COURSES

The following types of courses are available:

Lecture (VO)

Lectures are courses in which certain areas of a subject and the methods used in this area are imparted through didactic presentation.

Lab Course (UE)

Lab courses are courses in which students are instructed in specific practical skills, based on theoretical knowledge.

Practical Course (PR)

Practical courses are classes in which students deal with specific topics independently, based on previously acquired theoretical and practical knowledge.

Compulsory Internship Seminar (PP)

The compulsory internship seminar is a class in which students deal independently with topics related to their internship placements, based on previously acquired theoretical and practical knowledge.

Seminar (SE)

Seminars are courses in which students are required to work independently on the respective subject, deepen their knowledge of the topic and discuss relevant issues.

Field Trips (EX)

Field trips are courses in which students have the opportunity to experience relevant fields of study in real-life practical application, to deepen their knowledge of the respective subject. Field trips can be taken to destinations both in Austria and abroad.

Master's Thesis Seminar (MA)

Master's Thesis seminars are seminars intended to provide students with academic support during the thesis writing process.

Mixed-Type Courses

Mixed-type courses combine the characteristics of the courses named above (with the exception of project-type courses). Integration of different course-type elements improved the didactic value of these courses.

Project Course (PJ)

Project courses are characterized by problem-based learning. Under instruction, students work (preferably in small groups) on case studies, applying appropriate scientific methods.

Lecture /Seminar (VS)

Lecture/Lab (VU)

Lecture/Field Trip (VX)

Seminar/Field Trip (SX)

Lab/Seminar (US)

Lab/Field Trip (UX)

Lecture/Seminar/Excursion (VY)
